○Appointed May 4, 1914, in place of James P. Sawyer, deceased.

Report of the Mayor

To the Citizens of the City of Rutland:

I submit for your consideration my report for the year ending December 31, 1917.

It will be gratifying to every taxpayer to know that the financial condition of the city has never been more satisfactory than at the present time, and that the past year shows the largest reduction of the bonded debt of any year during the quarter of a century that Rutland has been a city. The treasurer's report shows the reduction to be \$72,434.40, made up as follows:

General appropriation to the sinking fund	\$8,000 00
School bonds Nos. 573 and 574, paid from the general fund	2,000 00
Water bonds due in 1924, paid from water funds	50,000 00
Net amount earned by the sinking fund	12,434 40

This leaves the net bonded debt only \$280,244.99. \$97,000 of this is water debt, \$66,000 of which is held in the sinking fund. Very few, if any, cities of the size of Rutland can make a better financial showing. While the present administration claims no special credit for the reduction of the water debt because the funds used for the purpose were on hand at the beginning of the year, it is a personal satisfaction to be able to report the retirement of these bonds during the year 1917.

I am pleased to state that there is no outstanding temporary indebtedness and that the year closed with \$58,925.59 cash in the treasury (exclusive of school funds), \$38,862.91 of this amount being in the water account; also that the city received nearly \$3,200 00 interest on current funds during the year.

It was necessary to increase the tax rate from \$1.80 to \$2.00 to meet the state tax of twenty per cent, assessed for war purposes, and a like amount will have to be provided for the year 1918.

I call attention to two statements which will be appended to the city treasurer's report: one showing the grand list and tax rate for each of the past twenty-five years, and the other the expenditures in each account for the same period.

DEPARTMENT OF PUBLIC WORKS.

The unusual amount of work accomplished in this department during the past year could not have been done without what is practically a gratuitous service by our Commissioner of Public Works, who gave of his time, ability and experience in self-sacrificing devotion to public welfare.

Efficiency has been the watch word of the hour, and I am positive that every hundred cents expended has produced a dollar's worth in return.

Most of the equipment in this department is worn out, and while effort will be made to repair where possible, absolute necessity may compel the purchase of at least two pieces of road machinery. I hesitate, however, at this time in making any recommendations that would entail the expenditure of a considerable sum of money. Our policy during the present year will be, as in the past, to meet conditions as they present themselves, having in mind at all times the state of our finances.

The public welfare has received first consideration when street improvements were contemplated; the natural consequence has been that the twenty per cent of the Grand List appropriated by law for highway purposes has given gratifying results.

I respectfully refer you to the report of our Commissioner of Public Works for a detailed account of the work of this Department.

DEPARTMENT OF PUBLIC SAFETY.

Fire.

Our Fire Department, while lacking in modern equipment necessary to attain the best results, has nevertheless on more than one occasion proven its efficiency by the service performed.

Police.

It is remarkable that a city the size of Rutland could be safe-guarded by such a small police force; this in itself is ample guarantee of the high quality of the work rendered by these men.

The recommendations of the Commissioner of Public Safety are the result of a close association with and a careful study of the needs of both departments, and are worthy of your most earnest consideration.

DEPARTMENT OF CHARITIES AND CORRECTIONS

The successful management of the poor calls for a particular kind of knowledge and capacity. The solution has been found in the appointment by my predecessor of the present Overseer

and his worthy wife who have successfully conducted both kinds of work. A closer alliance of all charitable associations with the city's poor department would contribute to clearer knowledge and understanding of the needs of the city's poor, avoiding excessive help for some, perhaps, and little help for others who are worthy. Under the guidance of the Overseer of Poor for the purpose of unity of action greater efficiency will result in achieving the end sought.

HOSPITAL AND LIBRARY.

The Rutland City Hospital and Rutland Free Library are worthy of our every effort; their value has been well proven and their continued maintenance is an absolute necessity.

In conclusion I desire to express my appreciation to the heads of the various departments and thank them and all who assisted me in the performance of my duties during the past year.

Respectfully submitted,

HENRY C. BRISLIN,

Mayor.

Report of the City Treasurer

To the Honorable City Council:—

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending Dec. 31, 1917.

RECEIPTS

Taxes received by City Treasurer	\$219,083 32

Respectfully submitted,

NEWMAN K. CHAFFEE,
HENRY F. FIELD,
JOHN N. WOODFIN,
Commissioners of Sinking Fund.

Report of the Commissioner of Public Works

To the Honorable City Council:—

Gentlemen:—The following is a report of the work done by this department during the year of 1917:—

In addition to the regular work of cleaning up streets, filling small holes and scraping, the streets were oiled, most of them twice, and the following tables will show the work done and the cost of same.

RECORD OF IMPROVED STREETS			
	Feet	Miles	Miles
Earth roadway December 31, 1916.....	157,793	29.91	
Macadamized in 1917	3,054	.57	
<hr/>			
Earth roadway December 31, 1917.....	154,739	29.34	29.34
Macadam roadway December 31, 1916.....	99,461	18.85	
Earth roadway macadamized in 1917.....	3,054	.57

STREETS

At the beginning of the year our streets were so generally out of repair that quite a large percentage of the street money has necessarily been used in repairing and resurfacing some of the worst sections of street surfaces. The Street Department activities like all other work was considerably delayed by the shortage of labor. However, in addition to the repairs we have constructed more than one-half mile of new macadam roadway as shown by the tables.

CRUSHER AND TRUCK

We crushed about 11,000 tons of stone, the larger part of which was delivered by the truck. The cost of labor and teams has increased the necessity for another truck in this department, probably a smaller truck with less capacity would be convenient to have for use in handling the lighter trucking.

SIDEWALKS

The sidewalks had received very little attention during the past year or two, consequently, we have repaired and rebuilt several sections of the older walks which on account of changes in grades, digging of ditches, etc., had to be reconstructed. We have also built about one-third of a mile of new concrete walks and about one and one-half miles of crushed stone walks.

SEWERS.

In this department we were somewhat handicapped the past year on account of shortage of labor and did not use but two-thirds of the amount appropriated for the work in this department, but succeeded in putting in a few short sewers and erecting thirteen catch basins that were badly needed.

WATER DEPARTMENT

The following tables will give all extensions of mains, new hydrants and valves set.

A cement retaining dam should be constructed in Mendon stream at intake valve, provided with flash boards, and flood gate should extend from present spillway to north bank five feet below bed of stream. This would direct all or very nearly all the water into large reservoir when the supply in stream is low.

 Still..... 49
 Total..... 90

Report of the Commissioner of Public Safety

FIRE DEPARTMENT

This Department is made up of the Chief Engineer, one first assistant Engineer, one second assistant Engineer, nine regular firemen and thirteen call men. This is the smallest department of any city in New England the size of Rutland, but the men are all fire-fighters and are on the job every minute from the time the alarm comes in until the release is sounded.

The expense of maintaining the Department the past year was \$12,199.03. An itemized account of the expenditures will be found in the list of orders paid by the City Treasurer.

Our fire loss the past year, a list of which is appended, amounts to \$26,601.34. This includes the loss on the furnishings of the Hotel Bardwell, but not on the building, the loss on which has not yet been adjusted.

The Bardwell fire was one of the most stubborn that the department has been called upon to subdue in many years. Occurring on the coldest day of an extremely cold winter, it was difficult to work to advantage; but the men stayed at their posts without complaint, regardless of frost-bites and other discomforts. A serious accident occurred at this fire when fireman D. E. Blanchard fell from a ladder fracturing both legs. He has since been confined to the City Hospital.

During the year the Department has responded to 90 alarms, an unusually large number. Of these 33 were bell alarms, 49 still alarms and 8 false alarms. Notwithstanding this large number of calls, the Department has succeeded in keeping the fire loss below the average.

The motor truck at Station No. 1 has done such efficient work that I would suggest that your Honorable body consider replacing in the future the horses at Station No. 2 with a similar truck. The cost of maintenance, aside from the liability insurance, is only about one-third of the cost of maintaining the horse-drawn apparatus, and it would add very much to the efficiency of the Department.

The need of an additional man at Station No. 1 still exists.

An inventory of the property in this Department shows a total value of \$27,712.12.

POLICE DEPARTMENT

The police department consists of one chief of police, an acting chief of police, six regular officers and 32 special policemen, Chief Bert S. Hyland and Patrolman Bert A. Barrett being temporarily relieved of their duties while in the service of the country.

The arrests during the year 1917 total 321, the least number handled by the local department in the last 15 years. Of these 220 were arrested for intoxication, while 101 were for other offenses. Of this number 16 were females and the balance males.

A recommendation of the addition of another regular patrolman made last year has not been acted on and still holds good, for, with the increase in the automobile traffic and the specially congested condition of Merchants Row where it is double tracked, an extra officer is an absolute necessity in the summer months at least.

The question of further ordinances governing the parking of automobiles on Merchants Row should be given consideration before the opening of the automobile season. With machines parked on either side of the row and electrics in traffic as usual, there are many times when it would be impossible for the fire truck to obtain passage in anything like proper time and when seconds may count for thousands of dollars. I would most respectfully suggest that a committee from the board be appointed to investigate this subject for report.

There is but one other serious problem facing the police force at the present time. This is the newsboy proposition. Youngsters six years old and from this to 10 years are on the streets until all hours of the night and with almost no parental control in many cases. This could be remedied to a certainty by the licensing of the newsboys, giving all who applied a license, this to be held just as long as he lived up to the rules laid down by the committee in charge of issuing the license and the accompanying distinguishing badge. Another way of assisting the officers in this matter would be the changing over of the fire alarm test from 8:45 o'clock in the morning to 8:45 o'clock at night and having this blow as a curfew.

The expenses of the Police Department for the year 1917 were as follows:

Pay roll	\$6,635 60
Commissioner's Salary	100 00
Telephone and Signal Service	213 71
Repairing Coats	30 00
Sundry Expenses	106 29
 Total	 \$7,085 60

Respectfully submitted,

GEO. E. CHALMERS,
Commissioner of Public Safety.

Report of the City Attorney

To the Honorable City Council:

Your City Attorney respectfully submits the following report from April 1st to December 31st, 1917.

While the city has not been engaged in any extensive litigation a reasonable amount of work has fallen to the legal department. Besides assisting Mr. Adams in bringing delinquent taxpayers into the fold, we have also co-operated with Mr. Hickey in instituting and prosecuting to successful conclusions several suits for the recovery of money expended by his department for which responsible individuals of adjoining towns were liable.

The controversy between the city and the State of Vermont, relative to the disputed ownership of a large tract of land on or near the city's water shed in the Town of Mendon has been equitably adjusted, a boundary line agreeable to all parties having been established by A. C. Grover, City Engineer, and L. F. Croft representing the State of Vermont. The settlement has been made permanent by the exchange of quit-claim deeds, which deeds have been duly recorded.

The case of the City vs. Michael Rooney is still pending on the report of the commissioners, Mr. Fenton looking after the interest of the city, your City Attorney being disqualified to act, owing to the fact that he appeared for Mr. Rooney at the trial of the case in 1916.

During the past year through the efforts of your Overseer of the Poor and the City Attorney several insane unfortunates have been removed from the city to the Brattleboro Retreat to be cared for at the expense of the State of Vermont, in accordance with the statutes.

ANNUAL REPORT

Your City Attorney has been pleased to advise and assist the various Boards, Committees and Officers of the city at all times when called upon so to do and has found the work most agreeable and pleasant.

With the exception of the Rooney matter, no legal dispute in which the city is interested is pending.

Respectfully submitted,

JOHN S. DORSEY,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I respectfully submit my report as Overseer of Poor for the year ending December 31st, 1917.

The cost of maintaining this department shows an increase over the preceding year, due chiefly to contagious diseases and the high cost of living.

The Isolation Hospital alone cost this department over \$650.00, \$548.00 of which was paid, the balance being in dispute. By isolating four cases at the City Farm and caring for them without extra help, heat, etc., we have saved additional expense.

I have collected during the year and paid into the city treasury \$900.62. Of this amount \$638.62 was reimbursements for money expended from the appropriation for the care of individuals, and out-of-town poor. By using \$631.05 of this amount the second time, and justly too, inasmuch as it was in the nature of a loan, we have succeeded in getting through the year without an extra appropriation and at a net cost of \$5,730.43.

It has been my aim to be economical as possible, having in mind the best interests of the city and poor alike. No deserving case, chargeable to the City of Rutland, has been neglected. Undeserving cases have been given temporary relief, the head of the family forced to go to work and provide for his dependents.

Respectfully,

J. J. HICKEY,
Overseer of Poor.

Report of Health Officer

To the President and Members of the Board of Health,
Rutland, Vermont.

Gentlemen:—Herewith I submit a report of the transactions of the Health Department for the year ending December 31st, 1917.

The number of transmissible diseases is somewhat in excess of 1916, due to an epidemic of scarlet fever (infected milk supply) and to an outbreak of German measles.

The city was entirely free from infantile paralysis in 1917.

In accordance with legal requirements I was summoned to view the bodies of 17 persons who died without medical attendance and after investigation death certificates were issued as follows:

Organic heart disease	5
Suicide by firearms	3
Steam railroad accidents	2
Abscess of brain	1
Pneumonia	1
Alcoholism	1
Accidental gunshot wound	1
Suicide by drowning	1
Accidental denatured alcohol poisoning	1
Marasmus	1

There were three deaths from typhoid fever, all in cases which had been brought to this city for treatment.

The following tables show statistics in detail:

TABLE A.
TRANSMISSIBLE DISEASES.

ELLEN B. CRAMTON,
Treasurer.

Report of the President of the Board of School Commissioners

To His Honor the Mayor and the Citizens of Rutland:

In compliance with State Law, I herewith submit my report as President of the Board of School Commissioners.

Now of all times, when our Country's ideals and institutions are at stake, the work of such an essentially American institution as our public school system should be thoroughly understood by its patrons. One of the tests of the efficiency of a system of training, whether intellectual or physical, is the ability of that system to adjust itself to an unusual condition, and the ability of the products of that system to meet the requirements that unusual conditions place upon them. "Knowledge is Power" and Knowledge is one of the few human qualities for which there is no substitute. An unusual condition confronts us and, to-day, the call is going up, from the heads of the governmental departments, for skilled minds, skilled hands, skilled bodies, in a word, for "Knowledge." If blind obedience and brute force, coupled with a preparation that was almost uncanny, was to be the great essential in twentieth century warfare, this world war would have ended in two short months. But this was not to be. The day of blindness and brutality is done, thank God, and in its place stands discipline and intelligent co-operation and undying faith in the right. Ours is no decadent Kultur, that seeks to justify its ends by murder, outrage, slavery and sacrilege, but a higher, truer knowledge that like our government is of the people, by the people, for the people, and which shall not perish from the earth. On the list of men who have gone from Rutland to join the colors, I recognize over one hundred and twenty names of recent graduates and students of our Public Schools and there are undoubtedly others with whose names

I am not familiar. Many of them are in France to-day, and this is the story of every Public School system in our country. Is this not a record of which to be proud? Does it not prove that our national system of education teaches something not found in books, something of patriotism and of sacrifice and of true manhood? Is it not an enterprise worth maintaining and worth working for?

FINANCES

It is hard to turn from the all engrossing thought of the hour and discuss dollars and cents, but the taxpayers naturally have an interest in these matters. The school finances are in a fairly satisfactory condition. Our financial statement has been published, and explains itself. To summarize, in 1917 the School Board paid its current expenses and in addition have reduced the deficit of 1916 over \$3000. In 1916 our assets exceeded our liabilities by \$208.59 and in 1917 the excess was \$2,483.74. In fact our only liabilities on December 31st were rent for the Dana School lots, which is not due until March, 1918, \$2,394.96 for fuel purchased in 1917 for use in 1918, and which might well be a charge on 1918, and three small bills aggregating less than one hundred dollars that were rendered too late to be paid before Dec. 31st. This is not a bad showing and is due to three things: (1) The Committee on School Buildings of 1916 went extensively into the work of repairs. Like all enterprises of a similar nature, when a man endeavors to correct the errors of years gone by or tries to bring an old building or an antiquated heating system up to date, repairs cost more than he originally expected or could have reasonably foreseen. The appropriation for repairs was necessarily overdrawn, and the Committee was subjected to severe criticism from some of our self-constituted censors. The ultimate result, however, was that the school buildings have required but little attention during the past year and the expenses for repairs have been reduced to a minimum. (2) To a combined effort on the part of Commissioners, Superintendent, teachers and janitors to exercise the strictest econ-

omy; no one realizes better than I how hard it is to deny the schools facilities for increased efficiency, but a difficult situation confronted us and thanks to combined effort it has, I hope, been successfully overcome. (3) To the increase of 5 cents on the Grand List in our annual School appropriation authorized by the taxpayers in March, 1917, and later approved by the Mayor and appropriated by the Board of Aldermen. I hope the financial showing made by the Board of School Commissioners during the past year has shown that this vote of confidence was justified and I take this opportunity to express the sincere thanks of myself and of my colleagues to the taxpayers, the aldermen and his Honor the Mayor for this very timely financial assistance.

The Board of School Commissioners have once more asked for an appropriation of 55 cents; from an experience on the School Board extending back to 1904, I seriously doubt if the Public Schools of this City can ever again be maintained at a satisfactory degree of efficiency on a 50 cent basis. The Schools asked for a 50 cent appropriation in 1905. At that time our average attendance was 1704 pupils between the ages of 4 and 18 including over 200 children enrolled in the Kindergarten. To-day we teach about 2200 pupils from about six years of age and upward. Then the value of our school property was estimated at \$155,700.00 and our insurance was \$59,000.00. To-day our City Treasurer reports the value of school property at \$207,000, on which we carry \$97,000 of insurance. Our pay-roll in 1905 was \$33,717.62 and now it is in round numbers \$49,000, and during this period fuel, supplies, text-books, everything connected with school work has increased in value and during this time our aid from the State has dropped from \$6,238.85 to \$2,579.17. School Boards and taxpayers in other cities of Vermont have been quicker to appreciate the plain trend of the times. Within the last four years Burlington, Rockingham, Montpelier and St. Albans have all received 55 cents on the dollar of their Grand Lists; St. Johnsbury and Springfield 60 cents, Brattleboro 58 cents, Bennington 64 cents and Barre 71 cents. And yet, until last year,

we in Rutland fondly imagined that we could do the impossible and with reduced State aid, with a greatly enlarged school plant, and with the price of every school necessity greatly increased, and with State demands and public sentiment more exacting, could maintain our schools upon the same 50 cent basis of appropriation that was ample for our needs ten and twelve years ago.

The buildings with the exception of the Dana School are old and some buildings were constructed without any regard to the modern requirements of school hygiene. Owing to the repairs made in 1916 the buildings should go for about three years without any great expense. From the nature of their use, school buildings always need more or less attention by way of small repairs and as complete a renovation every three years as school finances will permit. A large number of pupils have left school either to go to work or to enter the Country's service. I expect that more will leave, particularly during the spring term. This is most praiseworthy, but, I earnestly request the parents to co-operate with the teachers in preventing a sudden enthusiasm for industry on the part of their children to be used as a cloak for obtaining a grade promotion or a High School diploma, that under ordinary conditions would be impossible. If vocational courses for army conscripts are established in Rutland, the School Board stands ready to do everything in its power to make such courses successful. In the grades we have lost the services of two teachers by resignation but by a temporary combining of rooms have been able to avoid the necessity of hiring teachers to fill these vacancies. In all the schools there has been a marked enthusiasm in all branches of war relief work and investing in thrift Stamps and War Savings Certificates. A \$100 Liberty Bond has been purchased by the pupils for the benefit of the Red Cross. The High School has, in my judgment, showed a marked improvement in all departments and this in spite of several interruptions in work that in other days might have proved serious. In October two High School teachers left us, one to serve his Country, the other upon her

CITY OF RUTLAND

request for a temporary leave of absence. In November our instructor in Manual Training was granted a leave of absence on account of illness and one of our teachers of domestic science resigned. These vacancies have been filled very satisfactorily, and, considering the unsettled conditions that prevail in matters educational throughout the Country, we are very fortunate. The standard of the High School work has been raised appreciably and, considering the short time allowed for review, necessitated by the delayed opening of our winter term, the low percentage of failures at mid-years is very gratifying. I heartily congratulate the High School faculty upon the results obtained. Two courses, those in Commercial Law and in Economics are being brought up to a real high school standard and will undoubtedly prove their value in results obtained. The social and athletic activities of the schools have been maintained under careful supervision and in athletics the High School has met with perhaps more than its share of success. Nearly all of the young men who have joined the colors have been indentified with one or more branches of school athletic sport, and I cannot help feeling that the self-reliance, self-control and discipline necessary to all branches of interscholastic and intercollegiate sport will be of more use to our Country in her hour of need than characteristics produced by the "informal," "inter-class," and "intramural" type of emasculated athletics now in vogue in some of our institutions of higher education and apologetically referred to as a "war necessity."

I wish to take advantage of this occasion to extend my thanks to my colleagues on the School Board for the honor they have done me, and for the hearty co-operation of Commissioners, Superintendent and teachers alike.

I can hardly remember a year when the work on the School Board and in the schools has been more harmonious; one and all have tried to make the very best of the unsettled conditions of our Country, conditions that I regret to say show little sign of immediate improvement. The absence, by reason of illness,

ANNUAL REPORT

of Mrs. Cramton from meetings of the School Board has been sincerely regretted by us all and her return to our deliberations will be very welcome.

In concluding my mind once more goes back to the terrible war in which the youth of our country are doing such a splendid work, a work symbolized by our High School Service Flag with its ever-increasing number of stars, each star representing a young man from our High School who is very near and very dear to many of our Rutland people. "Good-bye, good luck, God bless them."

HARVEY R. KINGSLEY,

President of Board of School Commissioners.

City of Rutland, January 31, A. D. 1918.

Report of the Superintendent of Schools

*To the Board of School Commissioners and City Council of the
City of Rutland:*

In accordance with the regulations of your Honorable Board, and the requirements of the City Charter, I herewith present my twelfth annual report of the schools of this city.

The statistical tables and other data given in my former reports as a basis of comparison, also the reports of the Principal of the High School and the heads of the special departments have been prepared with the usual care for record in our office and for the press, but, by special direction of the Board, coupled with the desire to economize in the expense of printing, they will not be published in the city report as in former years.

The school enrollment, membership and attendance during the natural school year ending June thirtieth last, were practically the same as during the preceding year and the same high per cent of attendance was maintained. The attendance for the present school year has been less than normal due to the economic conditions in our country which attract labor at remunerative wages, resulting in some removals from the city, to the high cost of living which demands the greatest wage-earning power of the family, and to the fact that a larger number of children than usual are attending private schools. The decreased attendance, however, has been so slight that consolidation of schools was impossible except in two instances where the services of two teachers were dispensed with. This slight saving in the teaching force is more than offset by the large increase in the cost of fuel and other school supplies.

FINANCIAL STATEMENT

The financial statement for the year ending December 31st, 1917, made by the Finance Committee of the School Board, and incorporated into the City Treasurer's report shows that the gross receipts for the support of the public schools in this city for 1917 were \$69,889.68. Of this amount \$61,369.51 was realized from city taxes, \$2,579.17 from the State, \$3,305.50 from tuition, \$733.35 from the sale of high school text books, and the remainder, \$1,902.15, from incidentals, insurance, ground rent and unexpended balance of the previous year.

The total expenditures were \$69,688.35. Of this amount \$53,845.62 was paid for salaries, of which \$2,471.52 was due in 1916, \$3,399.44 for repairs on school buildings, of which \$2,292.08 was also due in 1916, \$5,160.80 for fuel, light and power, \$5,065.96 for text books and supplies, \$616.55 for insurance on school property, and the balance, \$1,599.98, for rent, printing and advertising and sundries, leaving a balance in the Treasury of \$201.33. The unexpended balance of \$75.54 from the special bond issue for repairs on the High School Building was applied to the architect's bill which exhausted that appropriation. An itemized statement of the assets and liabilities of the school department on December 31st, 1917, filed with the City Treasurer, showed that the assets which included cash balance in the Treasury, rebates accrued but not due from the State, fuel and supplies on hand aggregated \$5,043.50, while the indebtedness which included \$2,394.96 due for coal aggregated \$2,559.76, giving an excess in assets over liabilities of \$2,483.74. A similar statement of the assets and liabilities on December 31st, 1916, placed the excess of assets over liabilities at \$208.59. This favorable financial showing was made possible only by the exercise of the strictest economy in all departments, by restricting the use of school supplies, by limiting repairs to the absolutely essential, and by a slight increase in the school tax rate.

55c TAX RATE NEEDED.

Prior to last year the public schools in this city had been maintained on a tax of 50c on the dollar of the Grand List. For

several years the cost of conducting schools, not only in Vermont and in New England, but throughout our Country, has steadily increased. The same influences which have affected the cost of running state and national governments, large business enterprises such as railroads, manufacturing plants, etc., have also affected the cost of conducting the schools. Labor is asking larger returns, the state and the public in general are becoming more and more exacting in their demands. To meet these conditions and the high cost of living larger salaries must be paid in the schools as has been done in other lines of business.

Last year the city school tax was raised 5c on the dollar, which enabled the School Board to meet all bills for that year and reduce the indebtedness of the previous year between two and three thousand dollars. The School Board is again compelled to ask for this slight increase in the tax rate to meet the need of the schools for the present year. The following are some of the reasons why this increase is still necessary:—namely, the increased consumption of coal due to the enlargement and improvement of the heating plants and the advance in the price of fuel, which will probably result in an increased expenditure of \$2000 over that of 1915; the advance in the price of papers, pencils, pens, inks and brushes, which will without doubt cost the schools this year \$500 more than in 1916, and similar advances in the prices of supplies in the Manual Training, Household Economics and Science Departments. The demand for labor, skilled or unskilled, occasioned by the present economic and critical condition of our country has exhausted the surplus supply of teachers and a serious problem now confronts us in holding our present teaching force and in filling vacancies. Compared with the wages paid skilled labor in other lines of work the salaries paid our teachers are low. When a vacancy occurs, other than in the grades, it is almost impossible to fill the position satisfactorily at the salary previously paid and a higher salary paid a new teacher tends to create unrest and criticism from those employed at lower salaries. This condition of affairs is not peculiar to Rutland and is receiving serious attention in nearly every important town and city in the United

States; the general tendency is to increase teachers' salaries to meet the present crisis. When such increases are granted by other towns and cities, without similar action being taken here, it makes the situation in Rutland in retaining the services of our best teachers more acute. It would seem, therefore, that the only proper solution is to increase the salaries of our teachers and this cannot be done unless the city provides the funds. In case the tax rate is raised 5c on the dollar, I see no reason why such additional appropriation could not be apportioned by the School Board somewhat as follows: one-third to meet increased cost of fuel and supplies, one-third to meet indebtedness of former years and one-third to increase salaries.

TEACHING FORCE AND PENSIONS.

The teaching force has met with many changes during the present school year. Ten vacancies have occurred in the High School faculty besides two prolonged leaves of absence. These positions were filled as satisfactorily as was possible under the circumstances. There have been five vacancies in the grades; one was filled permanently, two temporarily and two, by consolidation of schools, were left unfilled for the present.

The changes in the High School faculty were occasioned almost wholly by low salaries and by the war. I have already referred to the need of increasing salaries. The influence of the war upon the entire teaching force has been felt seriously and will doubtless increase as the war progresses. One teacher is now serving in the army and two have married army officers. Five teachers now employed in the High School are within the draft age and may be called into the service. Several teachers are fitting themselves for government and business positions which offer great monetary attractions. It is, therefore, probable that our present teaching force will meet with further changes during the year, when the difficulty in filling the vacancies will have become more perplexing, since conditions that confront us are universal.

The sentiment among teachers in favor of a state system of pensions is very pronounced, but the present conditions seem

unfavorable for any new venture involving the expenditure of money. It is, therefore, probable that during the period of the war it will be very difficult to secure new and effective legislation on this subject. As soon as conditions become normal, the Educational department of the state will doubtless urge the enactment of additional pension laws, which will bring Vermont more in line with the other thirty or more states which have already taken favorable action in this matter. It is believed that such pension measures will receive the hearty support of the teachers and citizens of Rutland and that an effective pension system for the state will prove one of the most potent factors in insuring permanency and contentment in our teaching force.

SPECIAL SCHOOLS.

Continuation schools were in session for four weeks during the summer vacation open to High School as well as grade pupils. Without doubt by such means nearly a score of pupils in the High School, and double that number in the grades were kept from repeating the work of a full year. This saved the city nearly four times the expense involved. Such schools are fast winning general favor and are finding a permanent place in the Educational systems of many towns and cities, and this is the case in Rutland.

The School Board last winter conducted a Public Evening School during the winter term, the Educational Committee of the Rutland Woman's Club supplying the funds for paying the instructors. The same Committee guaranteed the funds for paying the instruction in a similar school this present season. The Board, while appreciating the generous offer of that Committee, deemed it unwise to attempt an Evening School this winter on account of the shortage of fuel, the postponement of all schools, and the large number of prospective scholars affected by the draft law. Personally, I am greatly in sympathy with this movement and believe that under normal conditions Public Evening Schools should be maintained in this city.

I have frequently expressed my approval of well-conducted Kindergarten Schools. In my opinion such schools should be open to pupils between five and six years of age and partake largely of the character of first grade schools, so that exceptionally bright and healthy children might pass from them directly into the second grade and enable other children not so favored to more easily and fully complete in two years the work of the first grade. Under our present system many more failures to make grade occur during the first year of the child's attendance than during any other single year; state and federal reports show that the failures during the first year of children entering at five years of age, are not more numerous than of those entering at six years. Should our Teacher Training Class be of considerable size next year it would seem possible to open two or more such schools and place them under that Department with little additional cost to the city.

In my report of last year I discussed at some length the aims and advantages of the Junior High School. Twenty-five such schools are now in operation in Vermont, many of them have passed the experimental stage and have demonstrated their right to exist. The most serious objections to starting at once a Junior High School in Rutland, are the disturbed conditions of the Country, the forced readjustment of grades in the several school buildings and the lack of funds to provide suitable accommodations and equipment. When conditions become normal, it is probable all these objections may easily be overcome and such a school established on a permanent basis.

HIGH SCHOOL.

The High School has had a successful year. Co-operation and harmony have prevailed in all departments and in all school enterprises. More serious application to study has been noticeable, and the standard of scholarship has been appreciably raised. Notwithstanding the fact that the High Schools everywhere have suffered much more than the grades by the disturbed conditions of the country, the attendance has been very satisfactory, and the tuition from non-resident pupils was the larg-

CITY OF RUTLAND

est ever collected in one year. The school is doing an important work in training the youth of this community and is worthy of the confidence and support which it receives. It gives me pleasure to endorse the report of its Principal and to incorporate into this report some of his data and important suggestions, as follows:—

“Elimination.—Last year we had a very high percentage of students who left school or did not return. Most of these were students who had failed in some of the work of the preceding year, either through lack of study or lack of capacity. A rather careful analysis of last year's losses from school seems to show that attention enough has not been paid to the Freshman classes. Where failures take place in the first year, there is quite likely to be a corresponding loss from school in the later years of the course. Last year we lost from school 128 students, about 100 of whom left because of failure. The elimination this year has been materially less. So far, we have lost 54 students. Of these, 11 left because of illness; and 19 withdrew because of failure or lack of interest. Constant attention to the two lower classes will still further reduce this elimination.

“Summer School.—During the month of July we ran a summer school at an expense of \$160. As a result of this, fourteen students who had failed in essential subjects were saved a year, while several others were able to make up some work. The small size of the classes in summer school made it possible to teach some of these students how to study, and their work in school this year has shown a very decided improvement. If conditions warrant, the school should be maintained next summer, and if possible, should be made a permanent feature of our school system. It costs about \$50 per year for each student. Saving a year for fourteen students, means freeing about \$700 worth of instruction that can be given to other students. This saving also means to the community that the students who save a year begin earning one year earlier. This, perhaps, means a saving of at least \$300 a year for each student.

"Failures.—Last year at the end of the first semester, the failures were 19.8%; that is, out of every one hundred hours of work taken by students, there was a failure of 19.8 hours. This percentage is unreasonably high. This year our percentage has been reduced to 10.7%. The bulk of failures has been caused by lack of interest on the part of either students or parents, or both. Some students have so many social activities and are up so late nights, that their energies are exhausted and they find it necessary to take their rest in school, in order to be ready for their more important activities of the evening. Of course the responsibility for the failure of these students rests squarely on the parents. Where parents have not the will power and back-bone to insist on the completion of school work, they have only themselves to blame if their children fail. There are also a few parents who wish their children to do a day's work at home in addition to their school work. Of course this is impossible and results in failure. On the whole, however, parents have shown a remarkable degree of co-operation, and a great part of the reduction in failures this year is due to the efforts of parents who have taken hold of the matter earnestly as soon as their attention was called to the cause of failure.

"A Summary of the Year's Progress:—

1. The failures have been reduced from 19.8% to 10.7%.
2. A definite course of study in English has been put into successful operation.
3. The work has been largely expanded in Domestic Science, Mechanical Drawing and Manual Training.
4. We have arranged for credit for work in Music done under the direction of competent and approved Music teachers, thereby allowing students to continue their work in Music and receive enough credit so that the rest of their school work can be materially lightened.

5. We have completed the organization of the school on a departmental basis, with uniform work, examinations and rating of papers in each subject.

6. By increasing the work in the special subjects, we have been able to keep the average size of classes at about twenty-two, and give each teacher one free period for individual assistance and correction of papers.

7. Our problems of discipline have not been serious this year, and the general spirit of the school has been largely improved.

8. We have made plans to increase our library facilities, and hope before the end of the year to have our library on a working basis.

9. Our greatest emphasis this year has been placed on increasing the efficiency of work in the English, Penmanship and Mathematics and our efforts are beginning to bear fruit.

10. Our students have engaged largely in war work activities, and have made a creditable showing in several branches.

"Recommendations.—I recommend that a definite salary schedule be introduced, whereby a teacher will receive, and know that she is going to receive, a definite increase of salary each year up to whatever maximum is fixed by the School Board. If a teacher is worth retaining at all, her services constantly increase in value for at least four or five years. By that time, she may have reached the maximum of efficiency and should be receiving the maximum salary, and that salary should be sufficient for the teacher to pay her expenses at least and devote a part of the vacation to professional advancement.

"I recommend that careful investigation be made to see if a co-operative course for mechanics can be profitably installed. Springfield has a course in which boys spend half their time in school and half in the shops and at the end of the four years

receive their high school diplomas and have also served their apprenticeship in a machine shop. This gives the town each year a few new mechanics who have general education enough to become extremely valuable men to the industries. The coming generation is to be one in which the trained manual worker will fill a more important and dignified place than ever before. The success of a particular industrial community will depend largely upon the number of superior men it can prepare thoroughly for this work. It is my judgment that the growth of Rutland will depend largely upon the quality of its skilled labor. The schools should begin at once to interest boys of mechanical tendencies in the higher quality of skilled Workmanship as a desirable, dignified and well-paid life work.

"The institution of a junior high school should also be carefully considered. It is my opinion that with proper departmental teaching in the upper grades, much work now done in the high school could be done to better advantage in the grammar school, and much work now largely done in the grammar schools could be better put off until the children are more mature. Incidentally, the entire school course could then be changed to twelve years instead of thirteen as at present. This has proved to have a pronounced effect in keeping more boys in school until they are better fitted to become valuable men in the community."

SPECIAL ACTIVITIES.

The School Board, teachers and pupils have each taken a lively interest in all special activities connected with the war. Whatever projects received the endorsement of the School Board have met with hearty co-operation by teachers and scholars and have been carried through to a successful issue. This has been the case in School and Community Gardens; in the purchase of a Liberty Bond; in contributing to the War Recreation Fund; in assisting in the drives of the Young Men's Christian Association, Knights of Columbus and the Salvation Army; in contributing time and money to the Red Cross, both Senior and Junior; in purchasing War and Thrift Saving Stamps, and in assisting

in the city's public charities carried on by the Parent-Teacher Associations of the city. The spirit manifested by each and all has been to do his or her part in winning the war.

CONCLUSION.

In closing this report I again make hearty acknowledgment of the unfailing courtesy, good will and assistance so generally extended to me during the past year by all with whom I have been associated.

Respectfully submitted,

DAVID B. LOCKE,

Superintendent of Schools.

Rutland, Vermont, February 15, 1918.

APPENDIX

LIST OF TEACHERS IN THE EMPLOY OF THE CITY OF RUTLAND DURING THE FINANCIAL YEAR ENDING DECEMBER 31ST, 1917.

Auditors' Report

To the Honorable City Council:

Your Auditors report that they have examined the accounts of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools and Sinking Fund Commissioners and find that all moneys received by them have been duly accounted for and that they have proper vouchers for all moneys expended. The books of these officials have been kept in first-class manner.

We desire to call attention to the fact that the city has received nearly \$3,200.00 interest on daily balances during the year—an item that might be overlooked in studying the financial report. We make special mention of this that the City Treasurer, to whose foresight this is due, may be given proper credit for looking after the city's interest in this respect.

We have examined the tax books in the City Constable's hands and find that apparently he has paid into the treasury all the moneys he has collected. There are uncollected taxes on his books as follows:

1904	\$0 23
1905	26 41
1907	63 69
1908	188 42
1909	31 46
1910	105 40
1911	133 65
1912	381 17
1913	378 88
1914	1,017 53
1915	1,062 16
1916	1,377 13
1917	2,799 00

ANNUAL REPORT

We understand that practically all the 1904-9 taxes are uncollectible, therefore we recommend that proper action be taken by the Board for the Abatement of Taxes to abate this list of taxes. We also recommend that the Constable be required to furnish a list of such of the 1910-13 taxes as he is not able to collect and that these taxes also be abated.

The amount of uncollected taxes for the years 1914-17 is much larger than it should be and we recommend that the Constable be urged to push the collection of these taxes and that the City Council give him such support and assistance as may be necessary to enable him to close the accounts for this period as soon as possible.

Rutland, Vt., January 31, 1917.

JAKE HEYMAN,
R. D. SMITH,
W. T. SIMONDS,

Auditors.
